About the program

One great educational program - 7 ways to attend!

Join us at one of 7 locations for a free education program designed to support you in navigating cancer survivorship.

Living beyond cancer brings unique challenges, but you don't have to navigate them alone. Join us for this free educational program designed for cancer patients, survivors, caregivers, and family members to learn how integrative health and survivorship services can support healing and well-being.

Discover practical strategies for managing treatment side effects, improving physical and emotional health, and enhancing quality of life. You'll also learn about resources available in your community, including oncology rehabilitation, mental health counseling, nutrition support, exercise programs, bodywork therapies, and other supportive care services.

Connect with local providers, ask questions, and leave with tools and resources to help you thrive in survivorship—body, mind, and spirit. We encourage you to invite your caregiver and family members.
