# LETTER FROM OUR CEO

It has been a privilege to serve as Cody Regional Health's (CRH) CEO for the past 22 years. We are so fortunate to have such an outstanding medical community providing healthcare services to residents throughout Northwestern Wyoming. CRH has experienced significant changes over the past 20 years. While much is changing in the landscape of healthcare across the country, one thing has not changed, CRH's commitment to improve the health and well-being of those we serve.

Our CRH family strives to continually improve the care provided to our patients. It is our goal to exceed our patients' expectations by providing safe, compassionate and personalized care. The best part of my day is rounding on our patients to personally speak and visit with them to ensure they are comfortable and pleased with their care.

We began 2018 celebrating and communicating our Cody Regional Health organizational name change to better represent our multiple campuses. We completed the renovation of our Cardiac Cath Lab and are excited about our joint venture with Billings Clinic to develop a Regional Cardiology Center. We broke ground on our state-of-the-art Medical Oncology Clinic and completed our renovation to the Big Horn Basin Cancer Center. We became the first hospital in Wyoming to offer a Community EMS program, and we have welcomed several new physicians to our medical family.

Healthcare continues to change at a rapid pace and remains constant. Cody Regional Health will continue to be proactive in creating our own needed change in an effort to control our own destiny rather than hoping change will not impact us or we wait for change to come. We have effectively created and followed our designed path to continue to be a leader in providing exceptional and compassionate care for everyone we serve. Our organization has experienced significant physical change, however, we have not changed our unwavering commitment to providing excellent care for all of our patients. We remain steadfast in our mission to "provide extraordinary healthcare to those we serve by people who care."

Our team at Cody Regional Health sets our organization apart from other rural healthcare systems. We have excelled in creating a culture of service excellence. Patients frequently tell me what a wonderful team we have, and our success is driven by the outstanding staff, physicians, hospital board, foundation board, volunteers, and leadership team, and support we receive from our patients and community. I'm grateful to be a part of the outstanding care and service our team provides every day to our patients. Cody Regional Health continues to be recognized as one of the leading Critical Access Hospitals in the country. ☺

Cody Regional Health encompasses professionals who have a passion for healing those who aspire to be healed. We have evolved from a small one-location hospital over 75 years ago to a healthcare system that reaches and serves all of Northwest Wyoming. Our roots are deep in personalizing, humanizing and demystifying the healthcare experience.

The iconic scenery that surrounds our facilities stimulates an extraordinary environment of healing. With a wide variety of services provided, and a focus on growth and innovation, we are the solution to meet your healthcare needs. Cody Regional Health will provide a healthcare experience that will exceed your expectations.

## VISION

The first choice for those who aspire to heal, be healed & lead healthier lives.

# NEW SERVICE

## CODY CARDIOLOGY CENTER

Cody Regional Health partnered with Billings Clinic last year to expand cardiology services to Northwest Wyoming. With planning behind us, the new Cody Cardiology Center is open for business and includes a Cardiac Catheterization Laboratory (Cath Lab). The Cody Cardiology Center Cath Lab is located at our main West Park Hospital Campus and our cardiology physician clinic is located at our Cathcart Health Center Campus.

Procedures that are being performed at the new Cody Cardiology Center include: cardiac catheterizations, pacemaker placements and defibrillator placements. Billings Clinic is providing interventional cardiologists monthly to complement services. The partnership with Billings Clinic brings the most comprehensive heart and vascular program to the Big Horn Basin region with a team of general and interventional cardiologists. 🏥

Our Cody Cardiology Center includes the newest X-ray technology systems allowing our physicians to merge different imaging modalities to guide procedures including new high-end, real-time 3D imaging. This provides us the ability to perform diagnostic and interventional cardiac catheterizations to diagnose and treat heart disease.

### CARDIOLOGY SERVICES

#### GENERAL CARDIOLOGY

Echocardiography  
Nuclear Cardiology  
Stress Testing  
Pacemaker Device Management

#### INTERVENTIONAL CARDIOLOGY

Coronary Angiograms  
Coronary Intervention  
Pacemaker Implantation

#### CARDIAC REHABILITATION

Exercise Counseling and Training  
Education for Heart-Health Living  
Counseling to Reduce Stress

#### CARDIOLOGY CLINICS IN CODY:

424 Yellowstone Ave., Suite 250

# WOMEN'S HEALTH & NURSERY

## JAMAICA SANTOS

Mental health therapist, Jamaica Santos, recently gave birth to a beautiful baby boy named Canyon Everett at Cody Regional Health. Becoming a mom completely changed Jamaica's life and helped her feel more appreciative of the little things, more present in each moment, and as though her capacity to love grew exponentially.

However, becoming a mom is not an easy task, and she wants to help future moms in dealing with postpartum emotions. Jamaica is partnering with Cody Regional Health by offering her expertise in our birth classes and support group resources starting in 2019.

"My experience at Cody Regional Health was extremely

positive. I just felt so supported through my pregnancy, labor and delivery."

Being a Licensed Professional Counselor, Jamaica enjoys learning about people and being a support when they need it. Through her experience with CRH's team, she realized how critical the perinatal period is and how she could offer support to this population. She is excited to help future moms and families by partnering with CRH. ☺

### TOPICS COVERED INCLUDE:

1. Recovery reminders and when to seek more help
2. Common thoughts and feelings after having a baby
3. How to cope when your birth plan gets derailed

4. Relationship and intimacy issues common for couples with new babies
5. Maternal mental illness, causes and treatment options
6. New mom stress, stress management and life strategies for wellness
7. Going back to work without guilt
8. Discussion about difficult topics

*"I want to make sure other moms have as much support as they may need during this beautiful but difficult life transition."*  
— Jamaica Santos

# ZERO SUICIDE INITIATIVE

*New processes saving lives and directing those with mental health issues to the right help.*

In 2017, Cody Regional Health joined the ZEROSuicide state initiative by putting together a specialized work committee. This committee was made up of hospital personnel from our Emergency Department, Behavioral Health, Prevention and Information Technology. Members of the community also joined in this effort from law enforcement, the school system, Yellowstone Behavioral Health and others who had an interest in the cause.

The ZEROSuicide Initiative is a nationally recognized program that focuses on a system wide approach to identify and provide

services for those at risk for suicide. Statistics have shown that 83% of people who died by suicide saw their health care provider in the year before their death. Only 29% of those who died in the past year were seen in an outpatient behavioral health setting.

Our team has been working through the ZEROSuicide toolkit to implement this organization wide and within our community. Our goal is that anywhere a patient presents for healthcare within our system, they are screened appropriately according to best practices. This screening uses the

PHQ-2 and PHQ-9 questionnaire. The questionnaire provides a numerical value which can then be correlated with a depression severity. Based on the depression severity, clinical staff discuss resources in the community and can set up a referral for the patient so they can receive the right help.

The Emergency Department at Cody Regional Health started using this process in January 2018. To date, they have over 80 referrals to behavioral health for patients who were at moderate risk. Testimonials from patients have said that by asking the questions and talking to them about resources, they were able to get the help they needed. These were patients who are not presenting for depression or suicide in the emergency department, but rather there for another illness.

The Walk-in Clinic at Cody Regional Health as well as the OB/GYN Clinic and Internal Medicine Specialty Clinic are all

83%

people who died by suicide saw their health care provider in the year before their death.

29%

Only 29% of those who died in the past year were seen in an outpatient behavioral health setting.

## ESSENTIAL ELEMENTS OF SUICIDE CARE

asking patients during their visits to help identify those patients who may need help, but would otherwise not seek help on their own.

Yellowstone Behavioral Health is also actively involved with the Zero Suicide Committee. Yellowstone Behavioral Health counselors are available 24 hours a day and are consulted when patients may need immediate help. We look forward to growing this approach to show how this initiative makes a major impact on the lives of our patients in the Big Horn Basin Region and beyond. 🌱

**LEAD** system-wide culture change committed to reducing suicides

**TRAIN** a competent, confident, and caring workforce

**IDENTIFY** patients with suicide risk via comprehensive screenings

**ENGAGE** all individuals at-risk of suicide using a suicide care management plan

**TREAT** suicidal thoughts and behaviors using evidence-based treatments

**TRANSITION** individuals through care with warm hand-offs and supportive contacts

**IMPROVE** policies and procedures through continuous quality improvement

# ORTHOPAEDICS

## ANDREW LEGLER

Local rodeo cowboy, Andrew Legler, recently broke his arm steer riding this past summer. Andrew loves the sport of rodeo and enjoys the thrill after the chute opens, but he knows it can be dangerous and understands the risks. He also loves fishing, hunting and being with his family.

At a young age, he realizes the importance of his health and how fast it can be taken away. His mom, Courtney Legler, also understands the risks but wants her son to follow his dreams and is there to support him.

Courtney knew everything would be okay when she brought Andrew in to CRH Orthopaedic Specialty

Clinic. As a nurse at CRH she trusts the team with her family's health. She shared with us that this was not the first time Andrew broke his arm, but it was the first time using CRH orthopaedic services since opening this year.

"I would definitely recommend CRH Orthopaedic to others in the community. They let us be involved in my son's care which made us more comfortable. They were also great about explaining everything. We love Jaclyn Ryan. She was super fun, informative

and caring especially to Andrew. This is a great place for children. They involved Andrew in his care from the very beginning."

Cody Regional Health's Orthopaedic team is the largest and most experienced team in Northwest Wyoming. With our walk-in services where no appointment is necessary, the service is available for your convenience. Our expanded services are now offered at our new location at 720 Lindsay Avenue, Suite C. 📍

*"I went sliding, sliding, sliding and broke my arm. They splinted me up."*  
—Andrew Legler

# INTERNAL MEDICINE

## PRIMARY CARE

Cody Regional Health offers primary care access at the Cathcart Health Center. Our Internal Medicine Specialists are here to take responsibility in providing a patient's comprehensive care. Our primary care providers are trained to focus on the prevention, diagnosis, and treatment of chronic adult diseases. Bringing a comprehensive approach and a broad knowledge of disease types, our providers emphasize health education, appropriate screenings and prevention in addition to acute and chronic illness diagnosis and management.

Complimenting services is Pharmacist, Ben Patrick. Ben is available to provide Coumadin management, medication education and medication reconciliation. Ben helps the primary care

providers to optimize your medication regimes so you are getting the most out of any medications you may be prescribed.

The Internal Medicine Specialists also include Liz Fabrizio, MSRDN, CDE, BC/ADM, a diabetes management and education provider. Liz provides services in the Internal Medicine Suite 230 at the Cathcart Health Center on a weekly basis.

When your primary care physician is not available after hours or on weekends, our Walk-in Clinic also at the Cathcart Health Center is there for you. The Walk-in Clinic providers are able to support your acute care needs with communication and follow up returned to your primary care physician. ☺

## PROVIDER FEATURE

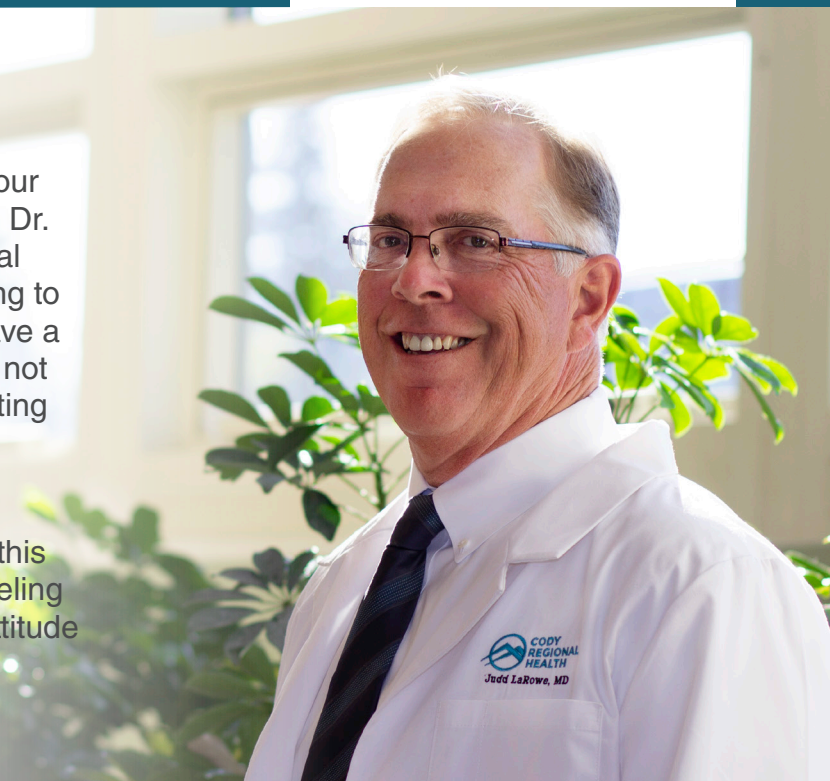

**Our providers work as a team to coordinate your medical care by:**

- Providing preventative care services
- Diagnosing and managing new medical conditions
- Managing chronic conditions
- Coordinating care with medical and surgical specialists
- Performing complete physical examinations.
- Performing DOT certifications and physicals

## JUDD LAROWE, MD

We are excited to welcome Judd LaRowe, MD, to our Internal Medicine Family at Cody Regional Health. Dr. LaRowe has over 30 years of experience in Internal Medicine and Rheumatology. He truly enjoys getting to know his patients at a personal level in order to have a positive impact on their lives. When Dr. LaRowe is not treating his patients, he enjoys fishing, hiking, hunting and theatre.

"Cody Regional Health is a progressive system delivering care that is unusual for a community of this size. In meeting the employees I found that that feeling persisted from top to bottom. There is a "can do" attitude that seems so prevalent in the west." ☺

*“I am proud of our dedicated team and how they continuously strive to make our organization better for our patients. Our department functions at a high level to bring the most current advanced medical care available in the pre-hospital environment.”*  
— EMS Director, Phillip Franklin

# COMMUNITY EMERGENCY TRAINING

Cody Regional Health continues to offer free training opportunities for our communities. This last year we partnered with Powell Valley Healthcare to create “Park County Heart Rescue!” Our goal was to train 500 community members in one year in “Hands Only” CPR. We’d like to report we’ve trained over 1,000 members in Park County and are going strong!

Our Emergency Department held 34 “Stop the Bleed” classes throughout Park County and provided education and a free tourniquet kit to approximately 400 community members. For more information about community training opportunities please visit [CodyRegionalHealth.org](http://CodyRegionalHealth.org).

**34** Our Emergency Department held 34 “Stop the Bleed” classes throughout Park County and provided education and a free tourniquet kit to approximately 400 community members.

## CODY REGIONAL HEALTH’S EMERGENCY DEPARTMENT

**12** Paramedics **2** Intermediates **28** EMT’S

CRH has 3 units staffed 24/7 every day of the year. Two of these units are at Cody Regional Health and one unit is in South Big Horn County.

Our EMS team covered a total of over 6,000 square miles.

**24/7**  
**6,000**

# CANCER CENTER

BRANDON JOHNSON, MD/ MEDICAL ONCOLOGIST

*“Cody feels like home to me, and I’m looking forward to being an active part in the medical community, as well as the community itself.”*  
— Brandon Johnson, MD, Medical Oncologist

Cody Regional Health is excited to announce Oncologist, Dr. Brandon Johnson, will be joining our Cancer Center team in March of 2019. Dr. Johnson graduated from medical school in 1999, where he finished his residency in Internal Medicine in 2002. He practiced primary care in Internal Medicine for 3 years but soon realized cancer treatment was his passion and where he belonged.

With his children grown, he knew some day he would want to work in Wyoming and obtained a Wyoming license just in case the opportunity arose. He was shocked to see a job opportunity in Wyoming, and even more thrilled to learn

it was in Cody. So the timing was perfect.

“I love my patients. Oncology patients are typically full of fight and hope, and I love getting involved in their fight. I love the science of oncology, and learning how to fight cancer at the molecular level. While we don’t win every battle, there is always a way to help every patient. I like making treatment decisions with my patients, then helping them through the plan—even when complications arise.”

Dr. Johnson loves the outdoors, wide open spaces, and when he’s not at work he enjoys solitude. As an avid fisherman

and hunter and conservationist, Dr. Johnson will fit right in. He also enjoys hiking and rock hounding, and loves spending time with his kids. He can’t wait to explore the West more with them.

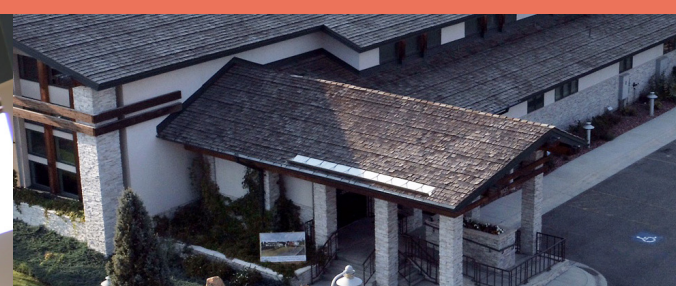

“I chose Cody Regional Health for many reasons—I love the facilities, the new Cancer Center, the town, the climate, and the people I will be working with. But most of all I like the people that will be my patients. I honestly haven’t met a grumpy person yet! No doubt this will happen, but then I would argue that there is a way to help everyone.” ☺

## Open House

### BIG HORN BASIN CANCER CENTER MEDICAL ONCOLOGY ADDITION

Our team and patients are enjoying the new cancer center addition as it provides a better healing environment and workspace. We have served over 3,000 patients in the last year. Our patients receive cancer services close to home with the same nationally recognized treatments. ☺

# Classes & Events

Cody Regional Health enjoys partnering with our communities to offer great services. One of the ways we work to improve overall health in our communities is by hosting multiple events and classes covering a variety of health topics.

We would like to give a big thank you to our team members for sharing their knowledge during these events and classes. All events and classes are supported by Cody Regional Health's Foundation and this allows us to keep everything free of charge to the public. We look forward to a full year of events in 2019. Please review some of the events and classes Cody Regional Health hosted in 2018! ☺

- STOP THE BLEED CLASSES
- HANDS ONLY CPR CLASSES
- REACH HEALTHCARE CAMP
- SPIN CODY
- LUNCH & LEARN: ANTIBIOTICS

# 2019 Events

## RAISING FUNDS FOR A NEW 3D MAMMOGRAPHY MACHINE

In 2019 Cody Regional Health Foundation will be raising funds for a new 3D mammography machine to support early breast cancer detection and the health of women in our community.

We are excited to announce two wonderful events to support this cause! SPIN CODY happening on Saturday, March 23, 2019 and the Barn Dance kicking up our heels on Saturday, August 3, 2019.

During SPIN Cody 2018, we raised over \$57,000 for a new cardiac catheterization laboratory and safe recreation space for the Cody community.

Join us for our 2nd Annual SPIN Cody bike race for

health and community on Saturday, March 23, 2019 from 9am till 3pm at the Paul Stock Aquatic and Recreation Center in Cody, Wyoming. It is a battle of fundraising, creativity and endurance! The day includes multiple teams of bike riders competing in 20 minute heats. This event is fun for all participants at any level. Music, door prizes, and friendly competition! Get a team together and earn your bragging rights!

Join us as a 2019 sponsor—we'd love to have you in our giving family.

Reserve your SPIN team or sponsorship for either event TODAY! 🚴
